PROJECTS

USA County Explorer | Interactive Map Site of US County Data   **usacountyexplorer.com**
- Site's main view is a map of all US counties with their data and a corresponding shading function that colors the map according to the users' preferences.
- Users can login to access full CRUD ability to add, edit, and delete the counties they want to view later.
- Built using D3.js, React, JavaScript, CSS, SASS, Node.js, PresgreSQL, Redux and API calls.

LyricsLog | Language Learning Site for Song Lyrics   **lyricslog.dev**
- Site for creating and viewing user submitted translations for song lyrics with the option to add explanations for each line.
- Song view highlights lyrics and explanations dynamically to facilitate learning.
- Built using React, JavaScript, CSS, SASS, Node.js, PresgreSQL, Redux and BCrypt authorization.

WORK EXPERIENCE

Translator | Self-Employed – USA, Ecuador, Brazil, Part-Time   **June 2017 – Present**
- Translated hundreds of safety and technical documents between English and Spanish.
- Investigated unfamiliar technical topics to better understand the information and choose the most accurate phrasing possible.
- Served as a personal interpreter in Ecuador on a clean water humanitarian trip, explaining the technical process of filter installation to locals.

English Teacher | Come Together English School – São Paulo, Brazil, Full-Time   **Nov. 2017 – Jan. 2018**
- Taught students of all ages and English levels as an international guest teacher.
- Organized and led language classes in an immersive environment, making use of a variety of teaching techniques to explain linguistic topics in an understandable manner.
